Foreword	vii
Section 1: Marine sand and gravel geology and resources	
D. J. HARRISON, C. LABAN, J. O. LETH & B. LARSEN: Sources of sand and gravel on the Northern European Continental Shelf	3
I. SELBY & K. OOMS: Assessment of offshore sand and gravel bodies for dredging	15
A. G. BELLAMY: The UK marine sand and gravel dredging industry: an application of Quaternary geology	33
R. S. ARTHURTON: The CIRIA research project on beach recharge materials	47
Section 2: Armourstone evaluation and shingle performance assessment	
R. S. THOMAS: The outlook for rock armour and beach recharge	59
J.-P. LATHAM: Assessment and specification of armourstone quality: from CIRIA/CUR (1991) to CEN (2000)	65
R. G. REES-JONES & E. STORHAUG: Meeting the demand for rock armour and its grading specification	87
D. A. LIENHART: Rock engineering rating system for assessing the suitability of armourstone sources	91
J. A. VAN MEULEN: Opening and operation of the Pasir Panjang quarry: a dedicated armourstone quarry in the Malayasian jungle	107
J.-P. LATHAM, J. P. HOAD & M. NEWTON: Abrasion of a series of tracer materials on a gravel beach, Slapton Sands, Devon, UK	121
Section 3: Aggregate testing and the use of alternative aggregates	
C. ROGERS: Canadian experience with the micro-Deval test for aggregates	139
A. R. WOODSIDE & W. D. H. WOODWARD: Assessing the wear characteristics of aggregate exposed at the road surface	149
A. R. WOODSIDE, P. LYLE, W. D. H. WOODWARD & M. J. PERRY: Possible problems with high PSV aggregate of the gritstone trade group	159
R. J. HOWARTH & W. J. FRENCH: A statistical study of aggregate testing data with respect to engineering judgement	169
A. K. BUTLER & A. M. HARRISON: An investigation of some alternative aggregates for use in concrete	185
M. A. EDEN: An approach to the abrasion testing of individual pieces of construction materials	193
Index	197
