

Contents

Preface	vii
Acknowledgements	viii
Section 1: Cleanup of contaminated land and groundwater	
D. M. MACKAY: Is cleanup of VOC-contaminated groundwater feasible?	3
M. C. CHAPPLE, L F. VITTORIO JR, W. A. TUCKER & M. G. RICHEY: Capillary influences on the operation and effectiveness of LNAPL interceptor trenches	13
S. GLENDINNING, C. D. F. ROGERS & D. I. BOARDMAN: Lime stabilization of inorganic contaminants in clays	19
N. R. G. WALTON & A. HIGGINS: The legacy of contaminated land in Portsmouth: its identification and remediation within a socio-political context	29
C. C. FERGUSON & J. M. DENNER: Human health risk assessment using UK guideline values for contaminants in soils	37
N. CHRISTOFI, I. B. IVSHINA, M. S KUYUKINA & J. C. PHILP: Biological treatment of crude oil contaminated soil in Russia	45
Section 2: Policy, protection and vulnerability	
S. CHRISTIE & R. M. TEEUW: A comparison of European State Policies on 'orphan' sites	55
P. E. HARDISTY, R. A. BRACKEN & M. KNIGHT: The economics of contaminated site remediation: decision making and technology selection	63
C. P. NATHANAIL & J. F. NATHANAIL: Professional training for geologists in contaminated land management	73
J. G. C. WILLS & C. J. F. P. JONES: Policy maturity and the development of novel remedial techniques	79
T. KEATING, M. J. PACKMAN & A. PEACOCK: The delineation of capture zones around small sources	85
M. GARNIER, A. LEONE, V. URICCHIO & R. MARINI: Application of the GLEAMS model to assess groundwater pollution risk caused by animal waste land disposal	93
T. J. BISHOP, M. J. PACKMAN & P. J. ALDOUS: Groundwater vulnerability and the Channel Tunnel Rail Link Bill	101
Section 3: Site investigation techniques	
J. P. HUGHES & A. D. TAER: Delineating the horizontal and vertical extent of hydrocarbon contamination using laser induced UV fluorescence	111
A. ARGYRAKI & M. H. RAMSEY: Evaluation of inter-organisational sampling trials on contaminated land: comparison of two contrasting sites	119
P. TUCKER, C. FERGUSON & J. TZILIVAKIS: Integration of environmental assessment indicators into site assessment procedures	127
Section 4: Pollutant behaviour on field sites	
I. JONES, R. M. DAVISON & D. N. LERNER: The importance of understanding groundwater flow history in assessing present-day groundwater contamination patterns: a case study	137
D. TORSTENSSON, S. F. THORNTON, M. M. BROHOLM & D. N. LERNER: Hydrochemistry of pollutant attenuation in groundwater contaminated by coal tar wastes	149
M. M. BROHOLM, I. JONES, D. TORSTENSSON & E. ARVIN: Groundwater contamination from a coal carbonization plant	159
R. M. DAVISON & D. N. LERNER: Modelling biodegradation in a groundwater environment: choosing an appropriate method	167
P. LINDSAY, F. G. BELL & N. HYTIRIS: Contamination of sediments in the Forth Estuary, Scotland	179
S. WALLACE, W. BURGESS, J. DOTTRIDGE, A. KIM, D. ZAMFIRESCU & F. ZAMFIRESCU: Characterization of extensive hydrocarbon contamination of an alluvial aquifer, Ploiesti, Romania	189

Section 5: Research on pollutant behaviour

K. BROHOLM, P. J. JØRGENSEN, A. B. HANSEN, B. NILSSON, R. C. SIDLE, E. ARVIN & J. FREDERICIA: Transport of dissolved creosote compounds through fractured clay: column and field experiments	197
M. M. BROHOLM, K. BROHOLM & E. ARVIN: Sorption of three heterocyclic compounds and their hydrocarbon analogue from coal-tar contaminated water in a natural clayey till	205
H. EL-GHONEMY: Estimation of solid phase activity coefficients for non-ideal cation exchange behaviour in laboratory samples of UK Triassic Sandstones	213
B. A. FRETWELL, W. G. BURGESS, N. L. JEFFERIES & J. DOTTRIDGE: Distribution of volatile organic compounds in porewater of the seasonally unsaturated Chalk aquifer	219
I. F. PATERSON, B. Z. CHOWDHRY & S. A. LEHARNE: An initial evaluation of Synperonic PE surfactants as soil washing agents	227
M. O. RIVETT, S. FEENSTRA & J. A. CHERRY: The relevance of a DNAPL-tracer test conducted at Base Borden, Canada, to solvent groundwater contamination in the UK	235
Index	243
