## Foreword

## Section 1: Marine sand and gravel geology and resources
- D. J. Harrison, C. Laban, J. O. Leth & B. Larsen: Sources of sand and gravel on the Northern European Continental Shelf
- I. Selby & K. Ooms: Assessment of offshore sand and gravel bodies for dredging
- A. G. Bellamy: The UK marine sand and gravel dredging industry: an application of Quaternary geology
- R. S. Arthurton: The CIRIA research project on beach recharge materials

## Section 2: Armourstone evaluation and shingle performance assessment
- R. S. Thomas: The outlook for rock armour and beach recharge
- R. G. Rees-Jones & E. Storhaug: Meeting the demand for rock armour and its grading specification
- D. A. Lienhart: Rock engineering rating system for assessing the suitability of armourstone sources
- J. A. Van Meulen: Opening and operation of the Pasir Panjang quarry: a dedicated armourstone quarry in the Malaysian jungle
- J.-P. Latham, J. P. Hoad & M. Newton: Abrasion of a series of tracer materials on a gravel beach, Slapton Sands, Devon, UK

## Section 3: Aggregate testing and the use of alternative aggregates
- C. Rogers: Canadian experience with the micro-Deval test for aggregates
- A. R. Woodside & W. D. H. Woodward: Assessing the wear characteristics of aggregate exposed at the road surface
- A. R. Woodside, P. Lyle, W. D. H. Woodward & M. J. Perry: Possible problems with high PSV aggregate of the gritstone trade group
- R. J. Howarth & W. J. French: A statistical study of aggregate testing data with respect to engineering judgement
- M. A. Eden: An approach to the abrasion testing of individual pieces of construction materials
