Contents

Section 1: Coastal and fluvial geohazards
F. G. BELL & T. R. MASON: The problem of flooding in Ladysmith, Natal, South Africa 3
J. PYRAH, A. DAVIES & D. G. Huws: A combined geotechnical/geophysical method for the prediction of liquefaction with particular reference to the Fraser River Delta, British Columbia 11
J. M. REYNOLDS: High-altitude glacial lake hazard assessment and mitigation: a Himalayan perspective 25
R. SINHA: On the controls of fluvial hazards in the north Bihar plains, eastern India 35
J. M. REYNOLDS, A. DOLECKI & C. PORTOCARRERO: Construction of a drainage tunnel as part of glacial lake hazard mitigation at Hualćán, Cordillera Blanca, Peru 41
R. J. MOORE, A. R. CLARK & E. M. LEE: Coastal cliff behaviour and management: Blackgang, Isle of White 49
R. J. MAHARAJ: The performance of some coastal engineering structures for shoreline stabilization and coastal defence in Trinidad, West Indies 61
R. J. NICHOLLS: Assessing erosion of sandy beaches due to sea-level rise 71

Section 2: Volcanic and seismic geohazards
W. J. McGUIRE: Volcanic hazards and their mitigation 79
J. GRATIAN: The distal impact of Icelandic volcanic gases and aerosols in Europe: a review of the 1783 Laki Fissure eruption and environmental vulnerability in the late 20th century 97
P. ESPER & E. TACHIBANA: Lessons from the Kobe earthquake 105
A. DEN OUTER & P. M. MAURENBRECHER: Earthquake-mail (E-mail) for low seismic zone earthquake hazard assessment 117

Section 3: Slope stability hazards
D. N. PETLEY: Engineering hazards in the Taroko Gorge, eastern Taiwan 125
R. EYERS, J. McM. MOORE, J. HERVÁS & J. G. LIU: Integrated use of Landsat TM and SPOT panchromatic imagery for landscape mapping: case histories from southeast Spain 133
X. MENG & E. DERBYSHIRE: Landslides and their control in the Chinese loess plateau: models and case studies from Gansu Province, China 141
G. J. HOLLAND & M. E. ANDREWS: Inspection and risk assessment of slopes associated with the UK canal network 155
J. M. REID: Small is beautiful: investigations and remedial works for minor slope failures 167
P. MC MILLAN & G. D. MATHESON: Rock slope hazard assessment: a new approach 177
D. M. PASCOE, R. J. PINE & J. H. HOWE: An extension of probabilistic slope stability analysis of china clay deposits using geostatistics 193
P. J. JENNINGS & H. J. SIDDLE: Use of landscape inventory data to define the spatial location of landslide sites, South Wales, UK 199

Section 4: Hazard mapping
G. J. SMITH & M. S. ROSENBAUM: Graphical methods for hazard mapping and evaluation 215
J. R. COOK, A. McGOWN, G. HURLEY & LEE ENG CHOI: The role of engineering geology in the hazard zonation of a Malaysian highway 221
P. NATHANAIL & J. NATHANAIL: Mitigating geohazards affecting mountain roads in northeast Somaliland 231
**CONTENTS**

M. R. Green, R. A. Forth & D. Beaumont: A hazard map of the Magnesian Limestone of County Durham 239

M. Cross: Landslide susceptibility mapping using the Matrix Assessment Approach: a Derbyshire case study 247

Section 5: Geohazards associated with underground subsidence and cavities

A. H. Cooper: Subsidence hazards caused by dissolution of Permian gypsum in England: geology, investigation and remediation 265

S. J. Rhodes & I. M. Marychurch: Chalk solution features at three sites in southeast England: their formation and treatment 277

S. Weston: A basic downhole geophysical approach to the investigation of shallow mineworkings 291

P. J. Mason, M. S. Rosenbaum & J. MCM. Moore: Digital image texture analysis for landslide hazard mapping 297

Section 6: Urban geohazards in developing countries

G. J. H. McCall: Geohazards and the urban environment 309

A. R. Lawrence, B. L. Morris & S. S. D. Foster: Hazards induced by groundwater recharge under rapid urbanization 319

M. Degg: Natural hazards in the urban environment: the need for a more sustainable approach to mitigation 329

A. R. Griffin & J. D. Mather: Landfill disposal of urban wastes in developing countries: balancing environmental protection and cost 339

Section 7: Geohazards associated with contaminated land

F. G. Bell, S. E. T. Bullock & S. Geldenhuys: Acid mine drainage and pollution: two case histories from South Africa 351

C. Fragkos, M. S. Rosenbaum, M. H. Ramsey & K. L. Goodyear: GIS techniques for mapping and evaluating sources and distribution of heavy metal contaminants 365

W. Hatton, G. Hunter, D. Hall & D. Haigh: Improved methods for developing and visualizing remediation strategies 373

Section 8: Planning and geohazards

B. Marker: Incorporation of information on geohazards into the planning process 385

M. J. Scott & I. Statham: Development advice maps: mining subsidence 391

D. Earle, B. Marker, P. Nathanail & J. Nathanail: Some issues associated with the preparation of a review of foundation conditions in Great Britain 401

P. J. Strange, S. J. Booth & R. A. Ellison: Development of ‘rockhead’ computer-generated geological models to assist geohazard prediction in London 409

A. Thompson, P. Hine, D. Peach, L. Frost & D. Brook: Subsidence hazard assessment as a basis for planning guidance in Ripon 415

F. G. Bell & M. G. Culshaw: Some geohazards caused by soil mineralogy, chemistry and microfabric: a review 427

Index 443
