- acoustic tomography 272, 309–310
- active packer string 317–318, 319–321
- aeromagnetic surveying 14
- Akjoujt Power Station, Mauritania 268–271
- Alaska 113
- alluvial soils, plate loading tests 197–203
- Altnabreac granite 260–261
- Arizona 197–203
- Ashby-Measham bypass, Leics. 138–143
- Ashby-de-la-Launde, Lincs. 339
- Australia 85–90
- Avon 67–75
  
- Barrow Hill, London 55–61
- Barton Clay, shear box tests 218–223, 235
- Berkshire 131, 287–294, 296
- Blue Anchor Formation 300
- borehole inflow estimations 335–343
- borehole logging 15–18
  - focussed packer testing 313–321
  - seismic surveys 299–307, 309–310
  - slim hole packer testing 323–325
  - Westbay multiple port piezometers 325–333
- borehole siting 273
- Bothkennar soft clay 33–37
- Boyn Hill Terrace Gravels 39, 40
- Bracklesham Sand, standard penetration tests, 122, 125
- Bradwell, Essex 323, 330
- Bray, Berks. 287–294, 296
- Bredon on the Hill, Leics. 138–143
- Brent Cross, London 95–96
- Bunter Sandstone
  - packer testing 345–350
  - resistivity 13
  
- calcarenites, deformability 205–215
- calibration, and pressuremeter tests 77–83, 93, 114–116, 118
- caliche soils 197–203
- California Bearing Ratio 137, 276
- caliper surveys 17
- Cam-clay model 35–37
- cambering, and stress testing 68
- Cambridge 97–99
- CAMFE program 34–35
- casing collar locator 17
- chalk
  - classification based on penetration resistance 150
  - dynamic probing 129–135
  - plate loading tests 8, 106, 117
  - pressuremeter tests 104–106, 117
  - resistivity soundings 289–290
  - seismic measurements 261–264
  
- clays
  - pressuremeter tests 23–31, 33–37, 67–75, 89
  - seismic tomography 309–310
  - shear box tests 7, 217–228, 235–237
  - standard penetration test 4
  - see also specific clays*
  - Clegg Hammer 138–143
  - Clegg Meter 276–280, 284
  - Coal Measures, pressuremeter tests 9
  - cohesion of caliche soils 197–203
  - compaction evaluation 4, 275–285, 295; *see also* settlement prediction
  - compactness of sands 4
  - compressibility of sands 125–126
  - compressional wave velocities 11–12, 259–265, 301
  - conductivity logging 17, 335–343
  - cone penetration tests *see* dynamic cone penetration tests; static cone penetration tests
  - cone resistance
    - and soil type 185
    - and undrained shear strength 178–179
  - consistency of clays 4
  - consolidation
    - and pressuremeter testing 23–31, 33–37, 63
    - and static cone penetration tests 6
  - Cowden, Holderness 99–104
  - cracks, tensile, and pressuremeter response 85–90
  - creep
    - pressuremeter tests on clay 23–31, 63, 117
    - pressuremeter tests on ice 111–116
  - crosshole seismic surveys 299–307, 309–310
  - cut and cover tunnel investigations 39–53
  
- Dalradian rocks, seismic measurements 12, 264–265
- deflectometers 138–143
- deformation moduli
  - in calcarenite, influence of scale on 205–215
  - and cone penetration test 6
  - in London Clay 7–8
  - and plate loading tests 7–8, 205–215
  - and pressuremeter tests 9–10, 23–31, 117
- density of sands 4, 6, 229–233; *see also* dry density measurements
- Devonian sandstone aquifer 336, 339
- dilatometers 10, 67–75, 77–83
  - Hughes 77–83, 118
  - Menard-type 67–75
- dipmeter surveys 17, 330
- dolerite, seismic tomography 309–310
- Dorset 131–132
- downhole measurements 15–18
- downhole seismic surveys 299–307, 309–310
- dry density measurements 275–276, 279–280, 283, 295

- dynamic cone penetration tests 137–143, 155, 164–165, 183–190; *see also* dynamic probing; standard penetration test; Swedish ram sounding
- dynamic probing 129–135, 149–150, 177–180
- Dynaplaque instrumented roller 138–143
- earth pressure coefficient 49, 53
- effective stress in fissured clays 217–228, 235–237
- elastic moduli  
and seismic measurements 259–260, 267–274  
and types of test method 7, 187–189  
*see also* deformation moduli; Poisson's Ratio; Young's Modulus
- electromagnetic measurements 13–14
- electromagnetic vibration exciter 278–279
- electronic logging 15–16
- Erith, Kent 129–130
- Essex 55–61, 323, 330
- evaporites 299–307
- failure, and stress testing 68–70
- falling weight deflectometers 138–143
- faults, prediction by seismic refraction 241–256
- Fawley Power Station, Hants. 218–223, 235
- fill  
compaction evaluation 275–285  
resistivity soundings 287
- fissured clays, effective stress 207–228, 235–237
- fissures and fractures, and packer testing 314, 317–321, 347–349; *see also* fracturing
- flood bank clay, shear box tests 217–218, 235
- flow tests 315–316, 318–321, 324–325; *see also* borehole inflow estimations; packer tests
- fluid-conductivity logging 17
- fluid-velocity logging 17
- FOKUS planning and simulation code 314, 317–318
- Folkestone Sand, standard penetration tests 121–127
- fracture index 249–253, 271
- fracturing  
prediction in granite 241–256  
and rock mass assessment 258, 260  
*see also* fissures and fractures
- freeze-thaw effects, and stress testing 68

## Special Publications of The Geological Society

- 51 The Cadomian Orogeny
- 50 Classic Petroleum Provinces
- 49 The Geology and Tectonics of the Oman Region
- 48 Geological Applications of Wireline Logs
- 47 Origins and Evolution of the Antarctic Biota
- 46 Phanerozoic Ironstones
- 45 Alpine Tectonics
- 44 Inversion Tectonics
- 43 Evolution of Metamorphic Belts
- 42 Magmatism in the Ocean Basins
- 41 Deltas: Sites and Traps for Fossil Fuels
- 40 Lacustrine Petroleum Source Rocks
- 39 Early Tertiary Volcanism and the Opening of the NE Atlantic
- 38 The Caledonian-Appalachian Orogen
- 37 Gondwana and Tethys\*
- 36 Diagenesis of Sedimentary Sequences
- 35 Desert Sediments: Ancient and Modern
- 34 Fluid Flow in Sedimentary Basins and Aquifers
- 33 Geochemistry and Mineralization of Proterozoic Volcanic Suites
- 32 Coal and Coal-bearing Strata: Recent Advances
- 31 Geology and Geochemistry of Abyssal Plains
- 30 Alkaline Igneous Rocks
- 29 Deformation of Sediments and Sedimentary Rocks
- 28 Continental Extensional Tectonics
- 27 Evolution of the Lewisian and Comparable Precambrian High Grade Terrains
- 26 Marine Petroleum Source Rocks
- 25 Sedimentation in the African Rifts
- 24 The Nature of the Lower Continental Crust
- 23 Habitat of Palaeozoic Gas in North West Europe (Scottish Academic Press)
- 22 The English Zechstein and Related Topics
- 21 North Atlantic Palaeoceanography
- 20 Palaeoecology and Biostratigraphy of Graptolites
- 19 Collision Tectonics
- 18 Sedimentology: Recent Developments and Applied Aspects
- 14 Variscan Tectonics of the North Atlantic Region
- 12 Petroleum Geochemistry and Exploration of Europe
- 11 Residual Deposits: Surface Related Weathering Processes and Materials
- 10 Trench-Forearc Geology
- 8 The Caledonides of the British Isles — reviewed
- 6 Geological Background to Fossil Man
- 2 The Fossil Record
- 1 The Phanerozoic Time-Scale

## Special Reports of The Geological Society

- 19 Magnetostratigraphy
- 18 Geophysical Logs in British Stratigraphy
- 17 Acritarchs in British Stratigraphy
- 16 Trilobites in British Stratigraphy
- 15 A Correlation of Jurassic Rocks in the British Isles, Pt 2, Middle and Upper Jurassic
- 14 A Correlation of Jurassic Rocks in the British Isles, Pt 1, Lower Jurassic
- 13 A Correlation of Triassic Rocks in the British Isles
- 12 A Correlation of Tertiary Rocks in the British Isles
- 10 A Correlation of Silesian Rocks in the British Isles
- 9 A Correlation of Cretaceous Rocks in the British Isles
- 8 A Correlation of Devonian Rocks in the British Isles
- 7 A Correlation of Dinantian Rocks in the British Isles
- 6 A Correlation of Precambrian Rocks in the British Isles
- 2 A Correlation of Cambrian Rocks in the British Isles
- 1 A Correlation of Silurian Rocks in the British Isles

## Memoirs of The Geological Society

- 12 Palaeozoic Palaeogeography and Biogeography
- 11 The Ophiolite of Northern Oman
- 10 The Chronology of the Geological Record
- 9 The Nature and Timing of Orogenic Activity in the Caledonian Rocks of the British Isles
- 8 A Palaeogeological Map of the Lower Palaeozoic Floor below the cover of Upper Devonian, Carboniferous and Later Formations
- 6 Late Pre-Cambrian Glaciation in Scotland
- 5 Shallow-water Sedimentation, as illustrated in the Upper Devonian Baggy Beds
- 4 The Geology of Portuguese Timor

## Geological Society Engineering Geology Special Publications

- 7 Quaternary Engineering Geology — available July 1990
- 5 Engineering Geology of Underground Movements
- 4 Planning and Engineering Geology
- 3 Groundwater in Engineering Geology
- 2 Site Investigation Practice: Assessing BS 5930

*Titles not listed are out of print*

\* Available from Oxford University Press

## The Quarterly Journal of Engineering Geology

An International Journal Encompassing Engineering Geology and Hydrogeology

Scientific Editor: A.B.Hawkins

Assistant Scientific Editor: K.M.Baxter

### Scope

The Quarterly Journal of Engineering Geology is an established international journal published by the Geological Society from its publishing house.

Papers are invited from both Fellows and non-Fellows from all areas of the world on topics concerning geology as applied to civil engineering, mining practice and water resources.

The journal also includes review articles, technical notes, meeting reports, book reviews, notices of meetings and photographic features. Occasionally, the journal is largely given over to a report, e.g. the Geological Society Engineering Group Working Party Report on Engineering Geophysics (1988, vol 21, no 3).

The journal has a wide international circulation, being essential reading for geologists and engineers in both industry and academia, especially those working in the following fields:

rock mechanics	geotechnics
applied sedimentology	soil mechanics
geohydrology	hydrogeology
engineering seismology	engineering geomorphology
engineering application of geophysics	

**Indexed Abstracted in :** Current Contents, Geological Abstracts, GEOREF, Petroleum Abstracts.

**Editorial Board:**

J.H. ATKINSON  
R.D. BARKER  
J.H. BLACK  
J.C. CRIPPS  
P.G. FOOKES  
R. HERBERT  
K.D. PRIVETT  
B.O. SKIPP  
G. WALTON  
G. WEST

#### A selection of papers

Probabilistic approach for design optimization of rockfall protective barriers, P. PARONUZZI (Italy)  
Seismic delineation of fissures associated with mining subsidence at Houghton-le-Spring, Co. Durham, N.R. GOULTY (UK) & J.E. KRAGH (UK)  
Stress-strain behaviour of sulphur concrete made with different aggregates and admixtures, B. CZARNECKI (Canada) & J. E. GILLOTT (Canada)  
The 1985 Bairaman landslide dam and resulting debris flow, Papua New Guinea, J. KING (Papua New Guinea), I. LOVEDAY (USA) & R.L. SCHUSTER (USA)  
Airborne multispectral scanning of subsidence caused by Permian gypsum dissolution at Ripon, North Yorkshire, A.H. COOPER (UK)  
Applications of geomorphology to small hydroelectric schemes, G.P. BIRCH (UK)  
The oxidation of pyrite in cement stabilized colliery shale, M.D.A. THOMAS (UK), R.J. KETTLE (UK) & J.A. MORTON (UK).  
The development of layered sediment beds in the laboratory as an illustration of possible field processes, M.J. EDGE (UK) & G.C. SILLS (UK).  
Estimation of groundwater resources of the Berkshire Downs supported by mathematical modelling, K.R. RUSHTON (UK), B.J. CONNORTON (UK) & L.M. TOMLINSON (UK).

### Submission procedure

Manuscripts should be prepared as outlined on the inside back cover of the journal, and sent to the Staff Editor: D C Ogden, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN, UK (Tel: 0225 445046 Fax: 0225 442836) There are no page charges. Advertisement enquiries should also be sent to this address.

#### Subscription rates 1990 (Volume 23)

(The journal is published in January, April, July and October.) ISSN 0481 - 2085

£96.00 (UK)	£115.00 (overseas)	US \$198.00 (North America and Japan only)
Single issue:	£28.00 (UK and overseas)	US \$ 59.40 (North America and Japan only)

For your **Free sample copy** and all orders and business correspondence relating to subscriptions should be addressed to : Journals Subscriptions Dept., Room Q1, The Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN, UK (Tel: 0225 445046 - Fax: 0225 442836)

Orders can be placed directly or through your usual agent.

# Journal of the Geological Society

Chief Editor: M. J. Le Bas

The Journal of the Geological Society is among the world's leading references for significant research in geology. It has been continuously published since 1845 and it enjoys a wide circulation throughout the world.

Only material of the highest quality is accepted for publication. As well as major research papers, the Journal publishes Conference Reports, Discussions and rapid publication Short Papers.

Indexed/Abstracted in: Current Contents, Geological Abstracts, GEOREF, Petroleum Abstracts, Mineralogical Abstracts.

## Editors:

J.R. ANDREWS  
D. BARR  
K.H. BRODIE  
B. CHADWICK  
H. COLLEY  
I.J. FAIRCHILD  
N.B.W. HARRIS  
R.J. PANKHURST  
K.T. PICKERING  
R.A. SCRUTTON  
D.J. SIVETER  
N.J. SOPER  
P.J. WILLIAMS

## Advisory Editors:

J.D. BELL  
F.W. CAMBRAY  
L.R.M. COCKS  
I.W.D. DALZIEL  
L.E. FROSTICK  
P.L. HANCOCK  
R.T. HAWORTH  
J.D. HUDSON  
A. NOTHOLT  
D. ROBINSON  
A. TAIRA  
P.A. ZIEGLER

## Forthcoming Thematic Sets

Palaeoclimates  
Nature and Analysis of the Stratigraphic Record  
Tectonics and Sedimentation  
The Murchison Silurian Symposium  
Geology and Geophysics of the Irish Shelf and Continental Margin  
Monitoring Active Volcanoes

## Forthcoming Papers

The San Nicolas batholith of coastal Peru: early Palaeozoic continental arc or continental rift magmatism? S.B. MUKASA (USA) & D.J. HENRY (USA)  
A buried granite batholith beneath the East Midland Shelf of the Southern North Sea Basin, J.A. DONATO (UK) & J.B. MEGSON (UK)  
Rapid thermal recovery of thrust related metamorphism in basement windows of the Scandinavian Caledonides, J.E. LINQVIST (SWEDEN)  
Geochemistry and origin of the Archaean Beit Bridge Complex, Limpopo Belt, South Africa, K.C. CONDIE (USA) & M. BORYTA (USA)  
Geomorphology and surface tilting in an active extensional basin, SW Montana, USA, J. ALEXANDER (UK) & M.R. LEEDER (UK)

## Submission procedure

Manuscripts should be sent to the Publications Secretary: Angharad Hills, The Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, Avon BA1 3JN, UK (Tel: 0225 445046 - Fax: 0225 442836) There are no page charges. Advertisement enquiries should also be sent to this address.

## Subscription rates 1990 (Volume 147)

(The journal is published in January, March, May, July, September and November)

£198.00 (UK)	£238.00 (overseas)	US \$ 400.00 (North America and Japan only)
Single issues:	£40.70 (UK and overseas)	US \$ 80.00 (North America and Japan only)

All orders and business correspondence relating to subscriptions should be addressed to: Journals Subscriptions

Dept., Room J1, The Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN, UK (Tel: 0225 445046 - Fax 0225 442836)

Orders can be placed directly or through your usual agent.

# CLASSIC PETROLEUM PROVINCES

**Geological Society Special Publication No. 50**  
 Edited by J. Brooks (Brooks Associates, UK)

The **Classic Petroleum Provinces** are still the world's major producers of hydrocarbons and will continue to be so well into, and through the 21st century. In recent years there has been a proliferation of publications on "Future Petroleum Provinces" in the hope that new exploitable hydrocarbon reserves will be discovered. However, the petroleum industry's present and likely future existence will continue to be focused in the **classic petroleum provinces** of the world. Recently much new data, new understandings, new interpretations, applications of modern concepts, re-evaluation of these new mature areas, fields and basins have resulted in the discovery of major new hydrocarbon accumulations. Many of these basins are not only **classic petroleum provinces**, but also classic geological provinces.

**Principal Authors**

- K.H. James (Shell, UK)
- R. Aymard (Corpoven, Venezuela)
- N. Chigne (Corpoven, Venezuela)
- M. Roberto (Corpoven, Venezuela)
- M.F. Dashwood (Clyde Petroleum, UK)
- W.U. Mohriak (Oxford University, UK)
- R.J. Hubbard (BP, UK)
- S. Creaney (Esso, Canada)
- J.A. Lopez (Amoco, USA)
- T.G. Falls (USA)
- D.H. Craig (USA)
- R. Sassen (Louisiana State University, USA)
- M.I. Hussein (Saudi Arabia)
- R. Stoneley (Imperial College, UK)
- A.S. Alsharhan (UAE University, UAE)
- P.J. Grantham (Shell, Netherlands)
- S.K. Paul (Sanpra Ltd, UK)
- R. Zaki (GUPCO, Egypt)
- H.M. Helmy (International Petroleum, UAE)
- H. Doust (Shell, Netherlands)
- K.J. Wober (Shell, Netherlands)
- M. Sella (DESI / GERM, Italy)
- D. van der Baan (Petroleum Development, Oman)
- K.W. Glennie (Shell, UK)
- A.J. Fraser (BP, UK)
- O.J. Heum (Statoil, Norway)
- R.M. Pegrum (Statoil, Norway)
- A.E. Kontorovich (NPO Sibgeo, USSR)
- I.I. Nesterov (Ministry of Geology, USSR)
- P. Dolan (Dolan & Associates, UK)
- V.D. Rahmavian (Exxon, USA)
- S.R. Lawrence (Quad Consulting, UK)

**Outline of Contents**

Venezuelan hydrocarbon habitat • Eastern Venezuelan Basin • Apure area of Southwestern Venezuela • Ceuta area, Venezuela • Oriente Basin, Ecuador • Campos Basin, offshore Brazil • Arctic Alaska microplate • Western Canada Sedimentary Basin • US Gulf Coast Basin • Northern Gulf Coast Basin • US Permian Basin • Jurassic salt basins of the Gulf Coast • Infracambrian salt basins of the Middle East • Middle East Basin: a summary overview • Giant Zakum Field, Abu Dhabi, UAE • Crude oils in Oman • Yemen: a future oil province • Sub-salt imaging in the Gulf of Suez • Southern Gulf of Suez: structural geology • Petroleum geology of the Niger Delta • Niger Delta reservoir geology • Petroleum geology of the Fossa Bradanica • Zechstein reservoirs in the Netherlands • Lower Permian Rotliegend reservoir, Southern North Sea • Intra-carboniferous play of Northern England • Hydrocarbon plays in the northern North Sea • Haltenbanken hydrocarbon province (Norway) • Lena-Tunguska petroleum superprovince • West Siberian oil and gas superprovince • Pakistan: history and future potential • Gippsland basin, Australia • Junggar Basin, Northwest China

- Contains recent advances in petroleum geology and petroleum exploration.
- International field of contributors from the oil industry, consultancies and academia.
- 568 pages
- 30 papers
- 457 illustrations
- 21 colour illustrations
- 1 colour flyout.
- Published May 1990
- Price £89.00, US\$ 140.00.
- ISBN 0-903317-48-6
- Primary audience: petroleum geologists, reservoir engineers, petrophysicists and sedimentologists.

## GEOLOGICAL APPLICATIONS OF WIRELINE LOGS

**Geological Society Special Publication No. 48**

Edited by A. Hurst (Statoil), M.A. Lovell (Nottingham University) and A.C. Morton (British Geological Survey)

Oil and gas exploration personnel will find Geological Applications of Wireline Logs of great value as it concentrates on the geological interpretation of downhole subsurface measurements. This volume covers a wide range of topics from conventional wireline log interpretation through to the evaluation of the latest nuclear (geochemical) and Formation Micro Scanner measurements. The volume centres on applications in potential hydrocarbon bearing environments. Also information is presented on engineering, hydrogeology, crystalline basement studies and numerical methods of interpretation. The papers are grouped according to their geological topics as: sedimentology, mineralogy and geochemistry, stratigraphic correlation, fault and fracture identification and physical properties.

### **Principal Authors**

D.C. Entwisle (British Geological Survey, UK)  
D.E. King (Schlumberger Well Services, USA)

### **Outline of Contents**

**Sedimentary structures of clastic rocks • FMS images in North Sea oil fields • gamma-ray log shapes • SHDT dip interpretation • well log interpretation • stochastic reservoir description • the language of rocks • carbonate reservoir heterogeneities: detection & analysis • lithofacies determination: new techniques • sediment cyclicity from well logs • interwell matching • geophysical logging, central India • geochemical logging applications • geochemical well logs • geochemical results: core and log data • mudrock evaluation: in situ analysis • NGS measurements in sandstones • North Sea Jurassic sandstones • source rock identification • circumferential acoustic logs • fracture detection • Gullfaks field dipmeter results • fault identification using dipmeter data • hydraulic conductivity from pulse tests • stress regimes in sedimentary basins • in situ stress from borehole breakouts • electrical properties of basalt • Christensen's equation**

- Presents unique insight into the diverse applications of wireline logs.
- International field of contributors from oil industry, service companies, academia and geological survey organisations.
- 28 papers
- 273 illustrations including colour plates
- Published January 1990
- Price £59.00, US\$97.00
- ISBN 0 903317 45 1
- Primary audience: petroleum geologists, reservoir engineers, petrophysicists, sedimentologists, mineralogists, stratigraphers and geochemists.
